Premium Intraocular Lens Options

|	
Monofocal Toric IOL	• *Excellent distance vision* Corrects moderate to large amounts of astigmatism only, for enhanced sharpness at distance. [NOTE: all lenses below also come in a toric version at a higher cost]
Eyhance Enhanced Monofocal IOL	• *Excellent distance vision* • *Some intermediate vision at about 26 inches (66 cm)* **NO increased risk of glare and haloes**
Symfony EDOF IOL **EDOF = Extended Depth of Focus**	• *Excellent distance vision* • *Superb intermediate vision range at about 20-28 inches* • *In some cases, casual reading vision at about 20 inches (52 cm), perhaps closer* This is the best choice for "getting-around vision", but not for avid readers. **It has a low incidence of haloes and glare.**
ZKB00 Multifocal IOL +2.75 Low Add	• *Excellent distance vision* • *Good intermediate and/or near vision at about 19.5 inches (50 cm) approximate* Designed to achieve a balance between reading and intermediate-vision activities such as lap reading, computer vision, reading the car dashboard, and grocery shopping. **It has a low incidence of haloes and glare.**
ZLB00 Multifocal IOL +3.25 Low Add	• *Excellent distance vision* • *Superb near-vision at about 16.5 inches (42 cm) approximate reading distance* Designed for most patients' average reading distance, favoring activities such as newspaper and book reading, and use of a smartphone or tablet. **It has a low incidence of haloes and glare.**
PanOptix Trifocal IOL +2.17/+3.25 Add	• *Good distance vision* • *Good intermediate vision at about 23.5 inches (60 cm)* • *Good near vision at about 15.5 inches (40 cm) approximate reading distance* For patients favoring a complete range of vision, understanding that there may be less perfection at each individual distance. **It has a low incidence of haloes and glare.**
